

Assignment 1 – Semester Review

Description

This assignment builds off the concepts you learned in this course.

Estimated Time

This assignment will take an estimated 1 hour to complete.

Important dates

- Email presentation slides by Dec 3rd at midnight
- You will present on Dec 7th in class
- (optional) Grade your teammate's contribution by Dec 7th at midnight

Deliverable

- Email your presentation slide(s)
 - A sample slide can be found here: https://algonquinlivecom-my.sharepoint.com/:p/g/personal/afrasia_algonquincollege_com/Eevg7H55LutNgxPEy-BWb-ABuxaFGY2Jdxcl6T87Gxe5Xw?e=6FILWf
- You will give a presentation at the allocated timeslot for you. Find the time of your presentation here:
 - [Presentation Schedule.xlsx](#)
- In Brightspace, optionally, you may submit a mark between 0 to 100 for your teammate(s), based on their collaboration on this presentation. Not submitting a mark, will result an automatic %100 mark for your teammate(s). Be fair with your teammates. They will know what mark you gave them.
 - 0 means that they did not even reply to your emails
 - 100 means that they completed their part of the work

Rules

- You will receive an email with your teammates and topics.
- If I do not receive your slides by due date, you will not be allowed to present, and you will lose all 5 points of the assignment.
- Your presentation should not take more than 240 seconds and must not be shorter than 180 seconds.
- You must not have more than five slides.
- It is not expected that you explain the concepts. Your presentation should list the most important bullet points. Imagine that you are preparing the class for the final

exam. This list does not have to be conclusive either. The intent is that you identify what are the most important items from the topic assigned to you, and you help the class to review them. 240 seconds is a plenty of time for that.

- I will stop the presentation right at 240th second.
- Only one person from each group will present. I will share my screen with slides that you emailed to me. You should be ready to go right away after the previous presentation ends.
- No introduction is needed. You jump right into the point!
- Do not spend more than 1 hour on this assignment. The goal is for you to review the course related slides, labs, and hybrid. There is no need to study any other materials or do additional research. This assignment should stay small in its scope.

Grading Scheme

- Attending all presentations – 2 points
 - Note that if you do not attend all presentations, you will lose the whole mark
- Presentation – 5 points
 - Includes:
 - Being on-time
 - Covering Points
 - Note: if your team does not do the presentation, you will lose the attendance portion of mark as well.
 - The presentation mark will be multiplied to the contribution mark your teammates gave you.
 - For instance:
 - let us say your team got 5 for presentation, and your teammates gave your contribution mark of %50. Your presentation mark will be $50\% * 5 = 2.5$.
 - let us say your team got 5 for presentation, and your teammates gave your contribution mark of %100. Your presentation mark will be $100\% * 5 = 5$.
 - let us say your team got 5 for presentation, and your teammates gave your contribution mark of %0. Your presentation mark will be $0\% * 5 = 0$.
 - let us say your team got 2.5 for presentation, and your teammates gave your contribution mark of %0. Your presentation mark will be $50\% * 2.5 = 1.25$.
 - etc.
